Hi Cindy,

Tomorrow's virtual learning sessions face a difficult challenge. Learners are distracted, schedules are packed, and attention is fragile.

Yet when delivery is intentional, live virtual learning can be remarkably powerful.

That is the focus of tomorrow's session: **Keeping Live Learning Impactful Under Pressure**

In this interactive experience you will:

- Practice behaviors that keep learners engaged
- Learn subtle moves facilitators use to orchestrate participation
- See how facilitation and production teams manage complexity together

You will also complete the **Top 19 Essential Virtual Facilitation Skills Self-Assessment** and leave with:

- A clear view of your strengths
- Growth opportunities to focus on next
- Practical techniques you can apply immediately

If improving live learning is on your priority list this year, this session is designed for you.

Reserve your seat and join us TOMORROW!

See you soon!

Karen
